

Specification sheet

# 22kW Electric Boiler

Our three phase, plug and play 22kW electric trolley mounted boiler is really popular in the construction sector. Because this boiler is electric, there's no need for connecting to gas or oil supplies – fantastic for instant heat in flats and small properties.

Predominately used for connecting to underfloor heating, this versatile boiler can be wheeled around and used in various locations on site. Being electric, it doesn't expel waste gases, so there's no need for a flue, meaning they can be positioned anywhere within a building.

<b>Maximum Output:</b>	21.6kW
<b>Pumps:</b>	Yes
<b>Temperature Range:</b>	85°C
<b>LTHW Connections:</b>	3/4 Inch
<b>Electrical:</b>	3 Phase, 32 Amp Male Commando Plug
<b>Flow Rate:</b>	Flow/Ret/Cold feed 1" BSP
<b>Dimensions (LxWxH):</b>	332mm x 442mm x 1100mm
<b>Weight:</b>	45kg
<b>Pressurisation Plant:</b>	Included
<b>Power Consumption:</b>	14.4/21.6kw
<b>Variable Temperature:</b>	Yes
<b>Handling Options:</b>	Trolley Mounted
